

# Fixflo

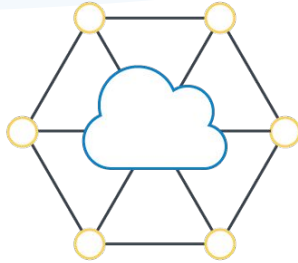

## Qube PM <=> Fixflo Integration

Fixflo Essentials and Professional

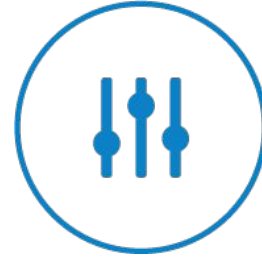

# How does the integration work?

## Data syncing

- Streamlines your data management processes
- Reduces double keying of information
- Helps to reduce your overall admin and setup tasks for getting Fixflo up and running

## Issue & Invoice Syncing

- Streamlines your invoicing and contractor management processes
- Reduces double keying of information

# Data Syncing

## What is synced:

1. Properties (Buildings & Units)
2. Leaseholders & Occupiers
3. Contractors/Suppliers
4. Cost codes (V11.4 onwards)
5. Issues & Invoices/Costs (from Fixflo  
> Qube PM)

## What is NOT synced (spreadsheet import available):

1. Landlords/Clients
2. Users
3. Building/Unit Assignment
4. PPM schedules
5. Assets

## Manual Entry Required

1. Property Notes

# Setting up the integration

## 1. Statement of Works

- You will need to contact your Account Manager and request that the integration be set up
- The MRI legal team will provide you with a Statement of Works to sign
- Once signed, a date can be booked in to set up the integration

## 2. Data Capturing

- Your dedicated Fixflo CS contact will arrange a call with you to talk through data requirements
  - We need to know how your properties and users in Qube PM are categorised so MRI know what to sync to Fixflo

## 3. Integration Setup

- MRI will book in a date to setup the integration (technical aspects and data mapping)
- MRI will test that the integration is working as expected
- We will contact you once complete to get you to review the data sync

# Fixflo

We're Fixing Repairs  
and Maintenance Management.

## Thank you.
